

Italian Plating Machines

Plate precious metal with confidence

Romanoff Italian Plating Machines are capable of plating gold, silver, rhodium, nickel, copper, and electrolytic degreasing.

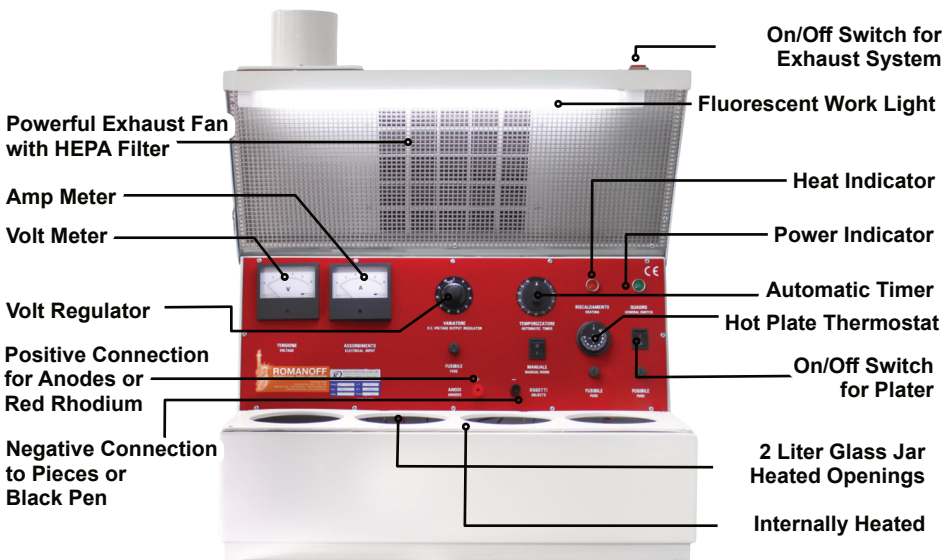

Each model comes with a built in rectifier and heater. The medium and large units have a lighted exhaust filter attached directly above the plating area. The large model comes with an adjustable agitator.

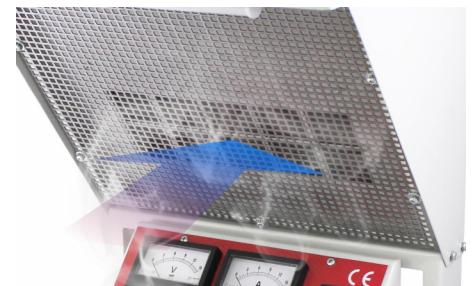

Rhodium Finish

18Kt Gold Finish

Optional HEPA Hood

Eliminates any harmful fumes and chemicals. (also available for the small plating machine.)
