

Aquapol[®] Electropolishers

Rapid Metal Surface Polishing

Aquapol[®] 100, Aquapol[®] Picco-Vario, and Aquapol[®] Mini polishing systems are the most effective, gentle and cleanest way to provide your jewelry pieces with a smooth, ultra-fine surface in a compact package!

Their powder-coated steel construction and intuitive internal running rotors make for a complete, durable electro-polishing system with a minimal footprint!

Applications

- Automatically polish gold, silver, brass, bronze and stainless steel
- Polish filigree parts and hard-to-reach areas
- Polish extremely small jewelry pieces
- Clean tarnished pieces
- Reduce polishing labor 40 - 60%

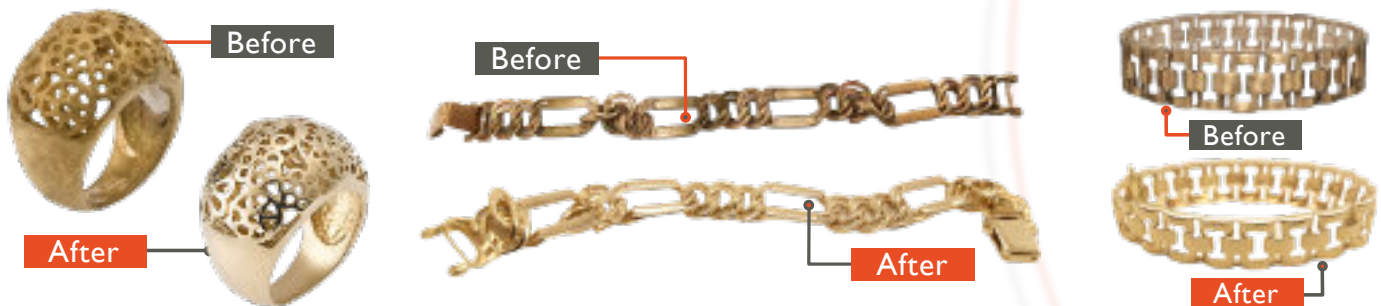

AquaPol[®] Starter Kit

From Rough Casting to Bright Polish in Under an Hour!

(Average polishing time: 30 - 45 minutes)

Aquapol[®] Micro Basket

Effortless Bulk Polishing for Precious Metals

KORAS Aquapol[®] Basket is a specialized solution designed specifically for small parts processed as bulk material. By eliminating the need for individual hangers or suspensions, this system streamlines the finishing process for intricate jewelry and medical components.

Applications

- Polish small findings such as beads, links, and more
- Professional-grade results in 35 minutes or less
- Polishes 8 - 21 kt Gold, including yellow and white alloys
- 100 - 300 ml capacity

SKU: 82-340

(Average polishing time: 25 - 35 minutes)
